4. The digital/analog television signal receiving set  
according to claim 2, wherein

said deletion member deletes the first analog  
television channel when the state of receiving shows to be  
5 received.

5. The digital/analog television signal receiving set  
according to claim 2, wherein

said deletion member deletes the second analog  
10 television channel when the state of receiving shows not to  
be received.
